

# Dseal EnduroSeal

EPDM · Wall-to-Wall (Refurb)

## — PRODUCT OVERVIEW

EnduroSeal is a wall-to-wall EPDM compression seal fitted with a collar, designed as a quick-fit flexible rubber strip for wall and ceiling movement joints. Supplied cut to suit in rolls up to 25 m, it can be surface mounted or recessed and suits most wall and ceiling finishes, for both interior and exterior locations, making it especially well suited to refurbishment work. The collared EPDM profile compresses into the joint and grips the surrounding finish for a fast, clean installation without major works. Made from durable EPDM rubber, EnduroSeal flexes with structural movement and resists weather, UV and ozone, giving refurbished and new walls and ceilings a reliable, long-lasting quick-fit seal.

## — TECHNICAL SPECIFICATIONS

Type	EPDM wall-to-wall seal (collar)
Material	EPDM rubber
Supply	Cut to suit, up to 25 m rolls
Mounting	Surface or recessed

## — DIMENSIONS

Orientation	Wall-to-wall and wall-to-ceiling
Roll length	Up to 25 m
Supply	Cut to suit

## — MATERIALS

Seal body	EPDM rubber with collar
Compound type	Elastomeric
Mounting	Surface or recessed

## — PERFORMANCE DATA

Weather resistance	Weather, UV and ozone resistant
Finishes	Most wall and ceiling finishes
Use	Interior or exterior

## — INSTALLATION GUIDELINES

1. Clean the wall or ceiling joint and remove old sealant, dust and debris
2. Measure the run and cut the EnduroSeal length to suit from the roll
3. Decide on surface-mounted or recessed fixing for the existing finish
4. Apply adhesive lubricant to the collar and joint contact faces
5. Compress the collared EPDM profile and fit it into the joint
6. Press the collar firmly against the finish so it grips evenly
7. Trim ends neatly, remove excess adhesive and check the seal is continuous
